Messaging Systems: Celery (async) and Kafka (sub-pub)
Databases: MySQL and Postgres
Web Servers: Apache, Nginx, and Node
Containerization with Docker via AWS or Kubernetes
Monitoring: Datadog, Sentry, AWS Cloudwatch, GCP Logs

Experience

- Outside Inc., Remote** 2022 -
Software Engineer II
Rolled out OAuth 2.0 and SSO backed by a Django driven OIDC server to provide auth of users
Lead developer behind a GDPR compliant deletion flow managed within the core Django backend
Built functionality to manage membership payment processing via a custom Stripe API integration
Migrated Outside's eCommerce backend from Falcon over to Django running on AWS
- TAGG Logistics, Remote** 2019 - 2022
Software Engineer II
Lead architect and developer for large-scale SAP EDI integration with Nestlé Global
Worked directly with stake-holders to provide seamless data flow in and out of TAGG's order ecosystem
Designed and built internal UI tools to optimize SOPs utilizing the Django template language, alongside the React and Bootstrap libraries
Software Engineer
Built custom reporting analytics based on a variety of interchange data formats for client consumption
Supported existing client integrations as their businesses scaled and their requirements changed
- May Digital Solutions, Remote** 2013 - 2015
Full-Stack Developer
Maintained and built custom web applications using Python, AWS, and Postgres
Commissioned to migrate multiple active WordPress sites over to dynamic and responsive Django apps
Helped build secure ecommerce platforms, including shopping carts and order management applications
Performed UI/UX design using Bootstrap and react libraries on top of Django templates
